Kinetrol Limited acquires ARIS Stellantriebe GmbH

Kinetrol Limited has taken the next strategic step in its growth journey by acquiring 100% of the shares in ARIS Stellantriebe GmbH from UBT Beteiligungs GmbH, a subsidiary of the noventic group. Legal and tax support for the transaction was provided by act legal Germany.

This acquisition unites the strengths of two established drive technology specialists. Kinetrol, based in the United Kingdom, is a globally recognised manufacturer of pneumatic actuators, known for their precision, durability, and performance in demanding industrial environments. With over 290 employees and an extensive international presence, Kinetrol serves customers across process and plant engineering sectors worldwide.

With its headquarters in Troisdorf, Germany, ARIS Stellantriebe GmbH brings more than 50 years of engineering expertise in electric actuator technology. ARIS is renowned for its compact, robust solutions and serves a global customer base in plant construction and industrial automation.

By joining forces, Kinetrol expands its portfolio to include electric actuation, enhancing its ability to meet the evolving needs of industrial automation across key markets in Europe, North America, and the Middle East. The partnership paves the way for innovation, synergy, and long-term growth.

The ARIS team will continue operations at its Troisdorf facility, maintaining continuity for customers, suppliers, and partners. All existing contact persons and management remain in place.

Together, Kinetrol and ARIS are well positioned to drive forward the future of smart motion.
