Effective from: 29th August 2026

Statement of Compliance

EU Persistent Organic Pollutants Regulation (EU) 2019/1021

1. Company & Manufacturing Context

Kinetrol Ltd. is a United Kingdom manufacturer of industrial pneumatic rotary actuators, dashpots, springs and associated control equipment. All design, final machining, assembly, and quality assurance processes are carried out at Kinetrol's facilities in the UK.

2. EU POP Regulation (EU) 2019/1021 Compliance

Kinetrol confirms compliance with the requirements of Regulation (EU) 2019/1021 on Persistent Organic Pollutants (POPs), based on supplier declarations, internal material reviews, and reasonable analysis of components used in Kinetrol's UK-manufactured products.

Specifically:

- **Kinetrol does not intentionally use any substances listed in Annex I or Annex II of Regulation (EU) 2019/1021** in the manufacture of its actuators, dashpots, positioners, switchboxes, solenoid valves, or accessories.
- Kinetrol products **do not contain POP substances** such as:
 - Polychlorinated biphenyls (PCBs)
 - Hexachlorobutadiene (HCBD)
 - Short-chain chlorinated paraffins (SCCPs)
 - Pentachlorophenol (PCP)
 - Brominated flame retardants listed under POPs (e.g., decaBDE, HBCDD)

- Kinetrol products are industrial mechanical articles and **do not generate unintentional POPs during normal operation**, such as combustion, thermal decomposition, or chemical synthesis.
- Supplier declarations and ongoing compliance reviews ensure that materials, coatings, elastomers, plastics, and electronic components used in Kinetrol products remain free from restricted POP substances.
- Kinetrol monitors updates to Annex I and Annex II and will revise this declaration if future regulatory changes or supplier disclosures require notification.

3. UK Manufacturing & EU Market Placement

Although Kinetrol manufactures exclusively in the United Kingdom, products placed on the EU market must comply with EU POP requirements. Therefore Kinetrol confirms that:

- All products exported to EU customers meet the restrictions and prohibitions of Regulation (EU) 2019/1021.
- No Kinetrol product requires exemption under Annex I Part A or Annex II.
- Kinetrol maintains documentation and supplier evidence sufficient to support EU market surveillance authorities, distributors, and end-users.

4. Summary

Based on current supplier information, internal assessments, and applicable regulatory requirements, **Kinetrol Ltd. declares that all products manufactured in the United Kingdom comply with Regulation (EU) 2019/1021 on Persistent Organic Pollutants (POPs)** as of the date of this statement.

Kinetrol will continue to monitor regulatory developments and update this declaration if new obligations arise.
